

RISHABH JAIN

r.jain79883@gmail.com | [+91 7988303997](tel:+917988303997) | New Delhi

[Leetcode](#) | [GeeksforGeeks](#) | [Github](#) | [Linkedin](#)

EDUCATION

Degree	Year	Institute	Score
B.Tech (CSE-AI)	2019-2023	Netaji Subhash University of Technology (formerly NSIT)	8.61 CGPA
High School, CBSE (Class XII)	2019	Heera Lal Public School, Delhi	93.4%
Secondary School, CBSE (Class X)	2017	Shri Kali Devi Vidhya Mandir, Hansi	10 CGPA

PROJECTS

Varta Sadhan- Real-time chat room web app

[Live Demo](#) | [Github](#)

- Designed and developed a progressive web **chat room** for communication.
- Multiple users can join and chat simultaneously in **real time**.
- Implemented real-time communication using **socket.io** library.

Pizza Delivery Web app

[Github](#)

- Developed a website for ordering various types of pizzas.
- Users can track the preparation stage in **realtime** and see all the orders placed .
- Admin can see customers' orders in **LIFO** manner and can also **update the status** of the order.
- Used **socket.io** library for showing the changed status of an order to a customer in real-time,

Marketing Strategy

[Github](#)

- Study and design a **marketing strategy** for a shopping mall to increase their revenue.
- Segments customers on the basis of their spending score and their income from their dataset.
- Used **K-Means Clustering Algorithm** under supervised Learning to group different customers.
- Successfully plot the customer groups using the **matplotlib library**.

TECHNICAL SKILLS

- Programming Languages:** Java, C, Python
- Database:** Mysql, MongoDB
- Web Development:** HTML, React.js, Node.js, Express
- Machine Learning:** Numpy, Pandas, Tensorflow Keras, Scikit Learn
- Tools:** Git, Github, VS code, Jupyter Notebook, MS Office, PowerBI

ACHIEVEMENTS

- Solved **350+** problems on [Leetcode](#) and **200+** problems on [GeeksforGeeks](#)
- Stood among the **top 5%** of all candidates in the NPTEL Course Financial Management for Managers (2022)
- Secured **99.5 percentile** in JEE Main among **1.2 million students**.

COURSE WORK

- Data structures and algorithms, Database Management Systems, Machine Learning, Discrete Mathematics, Operating Systems, Digital Logic Design, Theory of Automata and Computation, Innovation Business Models and Entrepreneurship, Mathematics for Economics.
